91 TV

How to install and activate

Thank you for your purchase. Your activation code is in your receipt email and on your order page.

1. Install the Downloader app

On your Android TV, open the Google Play Store, search for **Downloader** (by AFTVnews) and install it.

2. Allow installing apps

Go to **Settings › Device Preferences › Security & restrictions › Unknown sources** and turn it on for Downloader. Menu names differ slightly between TV brands.

3. Download 91 TV

Open Downloader, enter this code and press Go:

8033693

If the code doesn't work, type this address instead:
github.com/mohammedaalnoaimi-dot/91-TV/releases/download/latest-build/91TV.apk
When the download finishes, press **Install**, then **Open**.

4. Activate

Enter your activation code exactly as shown in your email and press **Activate**. Each code works on 2 TVs.

5. Add your playlist

Enter your IPTV provider's server and login, or an M3U link. 91 TV is a player only: channels and playlists are not included.

Moving to a new TV?

On the old TV open **Settings › Licence** and press it to remove the licence. Then activate the same code on the new TV.
